Kodak Alaris

BLI 2021-2022 PaceSetter in Distributed Capture

Kodak Alaris has claimed the prestigious Buyers Lab (BLI) 2021-2022 PaceSetter Award in Distributed Capture thanks to its...

- Info Input Solution and INfuse Smart Connected Scanning Solution

- Outstanding lineup of single-function scanners

- Simple remote device setup and management capabilities

- Highly rated technical support and professional services offerings

By digitizing documents the moment they enter your business, you can integrate them into automated workflows and share them immediately. As we continue to embrace cloud-based hybrid work, this type of technology is increasingly important. To determine which document imaging OEMs lead the market when it comes to distributed capture, Keypoint Intelligence evaluated vendors' portfolios of single-function scanners, software, and professional services offerings as well as their industry vision and strategy.

Kodak Alaris combines outstanding hardware with exceptional workflow automation and distributed capture solutions to help businesses optimize paper-based processes. The company's Info Input Solution and INfuse Smart Connected Scanning Solution provide customers with OCR, forms recognition, automated document classification and data extraction, and workflow automation capabilities. Kodak Alaris also has a comprehensive professional services business—including technical assistance, technology services, and optimization services—to guide customers to favorable outcomes.

"What's most impressive about Kodak Alaris's distributed capture technology is its simplicity," said Lee Davis, Associate Director of Software/Scanners. "Powerful workflow automation and single-touch scanning capabilities enable workers to kick off entire business processes with a few taps at the device's control panel. "Device setup is simplified by the Easy Setup feature, which minimizes setup time through the application of settings encoded in a QR code that has been scanned. Meanwhile, the Kodak Scanner Manager and MPS Capture Agent make it easy for administrators to monitor and manage the environment remotely."

About Keypoint Intelligence

For 60 years, clients in the digital imaging industry have relied on Keypoint Intelligence for independent hands-on testing, lab data, and extensive market research to drive their product and sales success. Keypoint Intelligence has been recognized as the industry's most trusted resource for unbiased information, analysis, and awards due to decades of analyst experience. Customers have harnessed this mission-critical knowledge for strategic decision-making, daily sales enablement, and operational excellence to improve business goals and increase bottom lines. With a central focus on clients, Keypoint Intelligence continues to evolve as the industry changes by expanding offerings and updating methods, while intimately understanding and serving manufacturers', channels', and their customers' transformation in the digital printing and imaging sector.

About BLI PaceSetter Awards

Based on exhaustive questionnaires, in-depth interviews, and a proprietary rating scale, Buyers Lab PaceSetter Awards recognize those document imaging OEMs that have shown market leadership in a variety of categories, including technologies, services, and key vertical markets.
